6 SEM TDC ZOO M 1

2017

(May)

ZOOLOGY

(Major)

Course : 601

(Parasitology and Ethology)

Full Marks : 48

Pass Marks : 19/14

Time : 2 hours

*The figures in the margin indicate full marks
for the questions*

1. Select the most appropriate answer from the given options : 1×5=5

(a) Dengue is caused by

(i) *Aedes* spp.

(ii) *Culex* spp.

(iii) Yellow virus

(iv) *Trichomonas* spp.

- (b) *Giardia* is mostly found in the _____ of animal.
- (i) liver
 - (ii) lungs
 - (iii) intestine
 - (iv) esophagus
- (c) For control of malarial parasites, the most realistic step will be
- (i) cleanliness
 - (ii) managing vectors
 - (iii) inoculation
 - (iv) chemical control
- (d) Filial imprinting is developed in animal
- (i) at the time of puberty
 - (ii) at juvenile stage
 - (iii) just after birth
 - (iv) at very early stages of life
- (e) River dolphin communicates through
- (i) photoreceptors
 - (ii) ultrasonic waves
 - (iii) olfactory mode
 - (iv) electrical waves

2. (a) Describe the life history of *Entamoeba histolytica*. 4
- (b) Briefly explain how endoparasites adapt themselves in the host body. 4

3. Write notes on any two of the following : 4 × 2 = 8

- (a) Pathogenicity of bacteria
- (b) Filariasis
- (c) Chemical communication

4. What do you mean by 'vector'? Name some vectors of protozoan diseases and disease caused by them. Also, mention certain effective measures for controlling the vectors. 1+4+4=9

Or

Briefly describe the life history, parasitic adaptation and pathogenicity of *Fasciola hepatica*. 3+3+3=9

5. What is the significance of 'orientation' in animal life? Discuss elaborately various types of orientation found in the animal world, giving suitable example in each case. 2+7=9

(4)

Or

Write elaborately on offensive and defensive behaviour of insects. Add a note on 'bee dance' and its significance. 6+3=9

6. Give an account of genetical and ecological aspects of animal behaviour with suitable illustrations. 5+4=9
